

An aerial photograph of a large industrial data center facility. The main building has a long, low profile with a grey corrugated metal roof. A section of the building is painted blue. In the foreground, there is a fenced-in area containing several large white cooling units with 'EURO DIESEL' branding. To the left, a tall white cylindrical tank stands. To the right, a parking lot with several cars is visible under green awnings. The background shows a cityscape and mountains under a clear blue sky. The Ascenty logo is overlaid in the top left corner, and the text 'FORTALEZA DATA CENTER' is at the bottom.

FORTALEZA DATA CENTER

Fortaleza Data Center

Located in Maracanaú, an important city in the Fortaleza Metro Area, our Fortaleza data center sits on a prized location, right next to the largest industrial districts in Northeastern Brazil, with easy access to the region's busiest highways.

The Fortaleza Data Center is carrier neutral, meaning that its customers can connect to a wide range of telecom carriers. In addition, Ascenty's dedicated fiber optic network connects the data center directly to multiple underwater cables at Praia do Futuro, expanding the connection possibilities of this site and reducing latency for international projects.

+ information on our Data Center

CONNECTIVITY

- Carrier Neutral.
- Dedicated Telecom meet me rooms.
- Direct connection with various submarine cables at Praia do Futuro

SECURITY

- 24/7 Monitoring using CCTV cameras with high-definition automatic movement detection.
- Dual authentication for access control using biometric and magnetic cards.

POWER

- Tri-bus redundancy system (three power lines servicing each data hall).
- Dual diesel fuel storage tanks with 48 hours of fuel autonomy without refueling.

COOLING

- Isolated technical corridors for equipment maintenance.
- Dual coil cold water chiller system.

Data Centers

- Colocation
- Smart Hands
- Deployment Solutions
- Disaster Recovery
- Work area
- Anti DDoS

Connectivity

- Lan to Lan
- MPLS
- DWDM
- Link IP
- Cross Connect
- PIX

Cloud Connect

- Oracle FastConnect
- Google Cloud Interconnect
- IBM Cloud
- Amazon Direct Connect
- Microsoft ExpressRoute

About Ascenty

Ascenty is a Digital Realty and Brookfield company and Latin America's largest data center provider, with 22 data centers in operation and/or under construction, interconnected by a dedicated fiber-optic network spanning 4,500 kilometers.

The company has developed and operated world-class data centers since 2010, serving some of the world's largest technology companies. In line with Ascenty's expansion project, the company received strategic investment from Brookfield, one of the largest asset managers in Brazil in the infrastructure and private equity segments. With Digital Realty, the company now takes on even more expertise by joining a global network of more than 260 data centers located across the globe.
