

Ascenty

A Digital Realty and Brookfield Company

VINHEDO CAMPUS

Vinhedo Campus

The city of Vinhedo was chosen as home to Latin America's largest data center campus. Near the city of São Paulo (approx. 44 miles), it enjoys a central and strategic location, with easy access to major highways and airports.

The campus currently has two data centers with 70MW capacity per unit and 495,000 sq ft of total space. In addition to the high quality and redundancy of the infrastructure, the data centers offer excellence in connectivity, with a dedicated fiber optic network or connection with carriers.

+ information on our Data Center

CONNECTIVITY

- Carrier Neutral.
- Dedicated Telecom meet me rooms.
- Direct connection with PIX Campinas and PIX São Paulo, and with main cloud providers.

SECURITY

- 24/7 Monitoring using CCTV cameras with high-definition automatic movement detection.
- Dual authentication for access control using biometric and magnetic cards.

POWER

- Tri-bus redundancy system (three power lines servicing each data hall).
- Dual diesel fuel storage tanks with 48 hours of fuel autonomy without refueling.

COOLING

- Isolated technical corridors for equipment maintenance.
- Dual coil cold water chiller system.

Vinhedo Campus – EXPANSION

The campus also has the capacity to add 3 new data centers, which combined with the units currently in operation, can reach up to 114 MW capacity and 90,000 square meters of floor space.

About Ascenty

Ascenty is a Digital Realty and Brookfield company and Latin America's largest data center provider, with 22 data centers in operation and/or under construction, interconnected by a dedicated fiber-optic network spanning 4,500 kilometers.

The company has developed and operated world-class data centers since 2010, serving some of the world's largest technology companies. In line with Ascenty's expansion project, the company received strategic investment from Brookfield, one of the largest asset managers in Brazil in the infrastructure and private equity segments. With Digital Realty, the company now takes on even more expertise by joining a global network of more than 260 data centers located across the Americas.
